

## GEST-H502 - KEY COURSE OBJECTIVES

- Introduce: (1) supply chain management concepts, (2) supply chain integration and (3) strategic supply chain management.
- Present the core strategic supply chain management strategies, discuss the integration of multiple strategies and familiarize with supply chain performance management methodology & tools.
- **Develop a real-life Business Case with the coaching of field experts.** Our privileged partner in this endeavour is 

## THIS YEAR'S BUSINESS CASE

### YOUR CHALLENGE

Design an integrated and demand-responsive supply chain solution for a multinational company. We expect from you more particularly:

1. To design the most cost-effective solution, considering constraints.
2. To evaluate the feasibility (financial benefit, process, tool and human capital) of your solution.
3. To propose a tactical implementation plan.
4. To discuss any paradox or tension you perceive in the implementation of your solution. Think about what you could put in place to deal with these paradoxes. = talk about the risks and how to manage them
5. To draft, for your solution, a comprehensive performance reporting section articulated around the elaboration of dedicated KPIs and of a dashboard to report consistently the data.

Give 5 KPI to monitor that our solution is working

I should have all the 5 points that are implemented

## PRACTICAL SESSIONS *(weight 80% of final mark)*

### *(Business Case Development)*

- **11 workshop sessions (2h the first one and 4h each of the following 11 sessions)**
