

Business Case

2026 Edition

Workshop 2

i.

Workshop 2 - Agenda

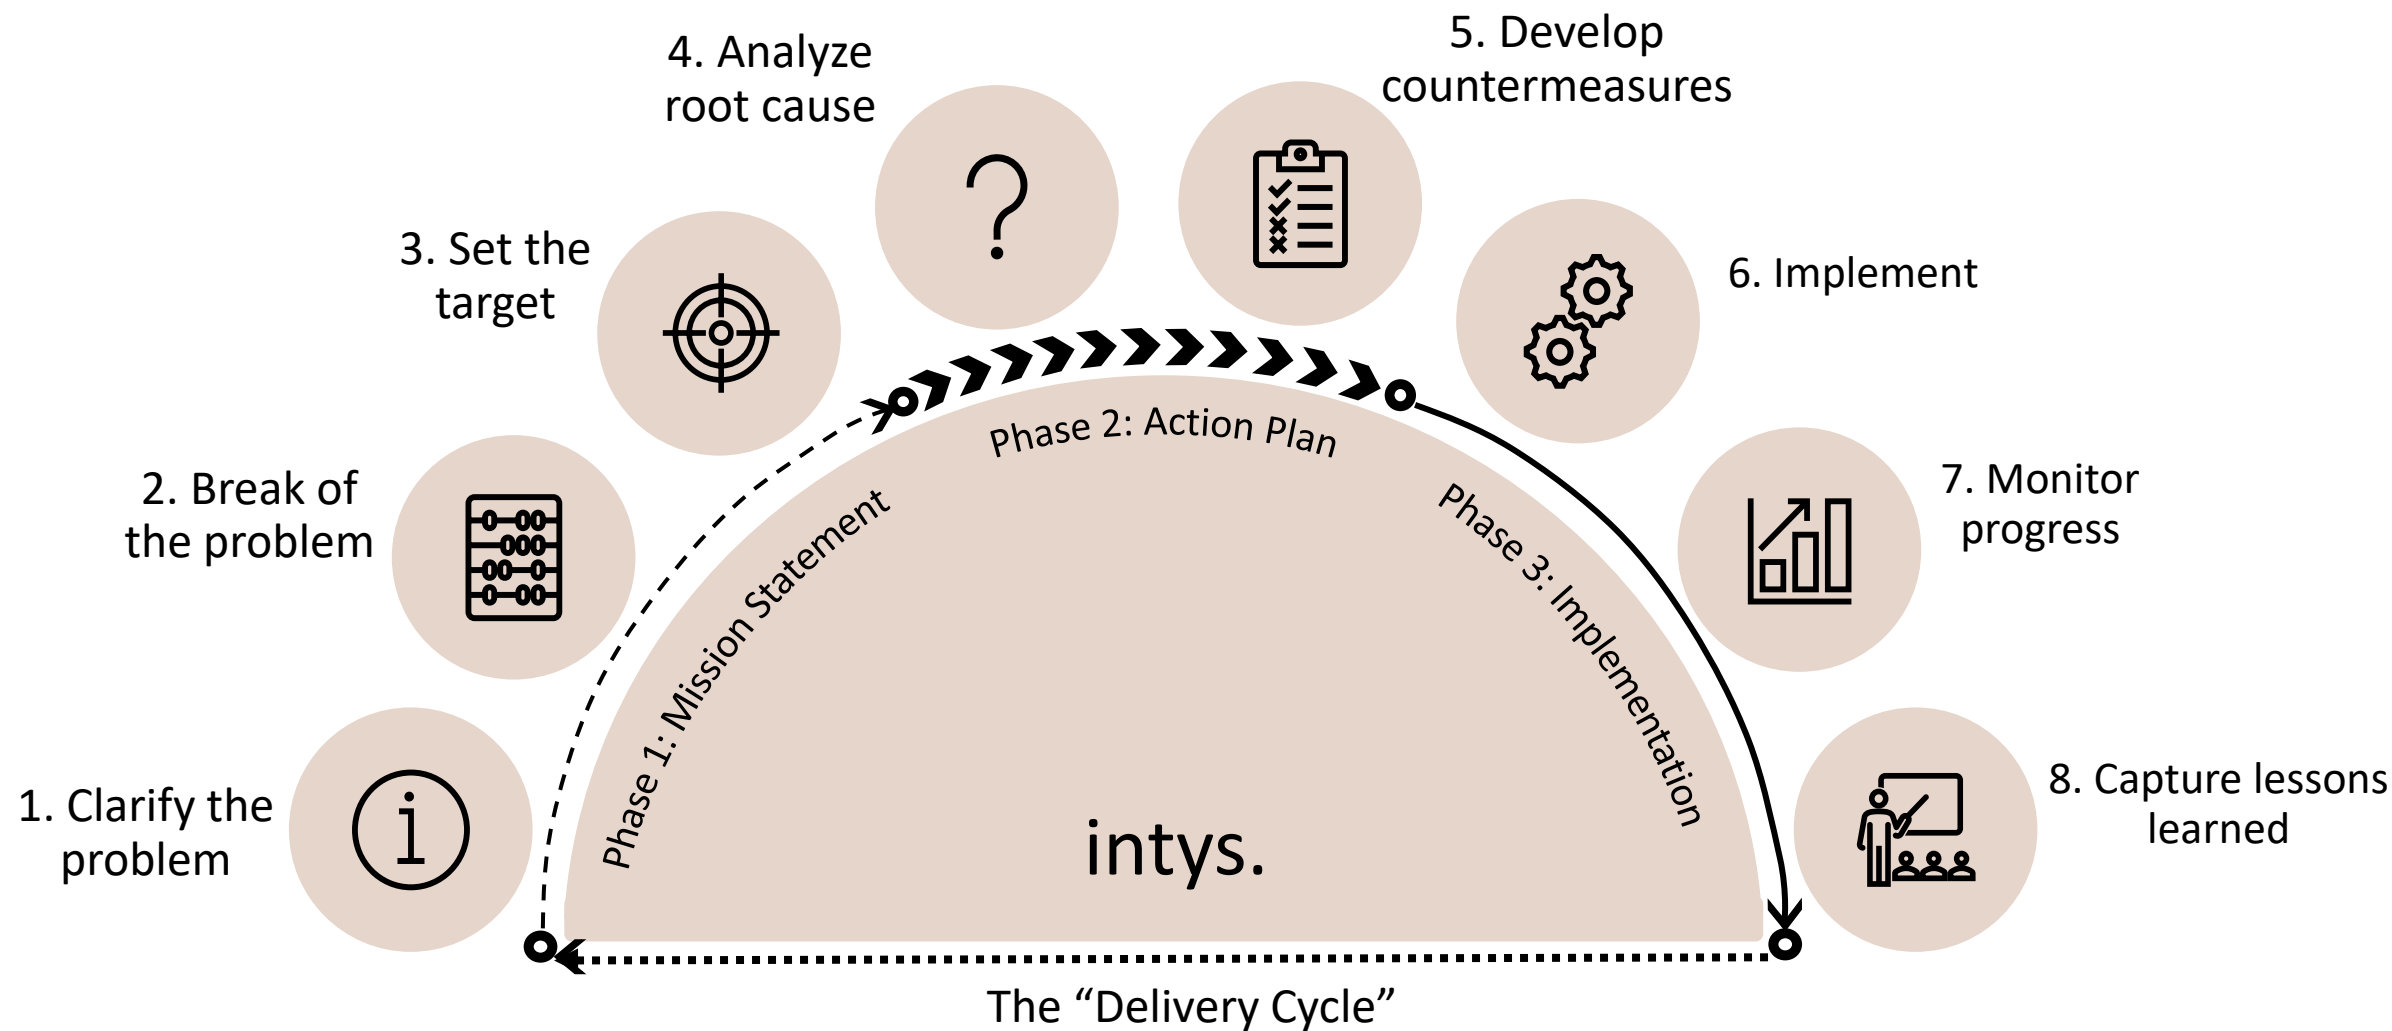

27 Feb 2026	Duration
ISolv 1/2/3/4	30 min
Working time in groups	120 min
Presentation and feedback	45 min

iSolv Methodology 1/2/3/4

Theory & Best Practices

ISolv Methodology – 8 Steps

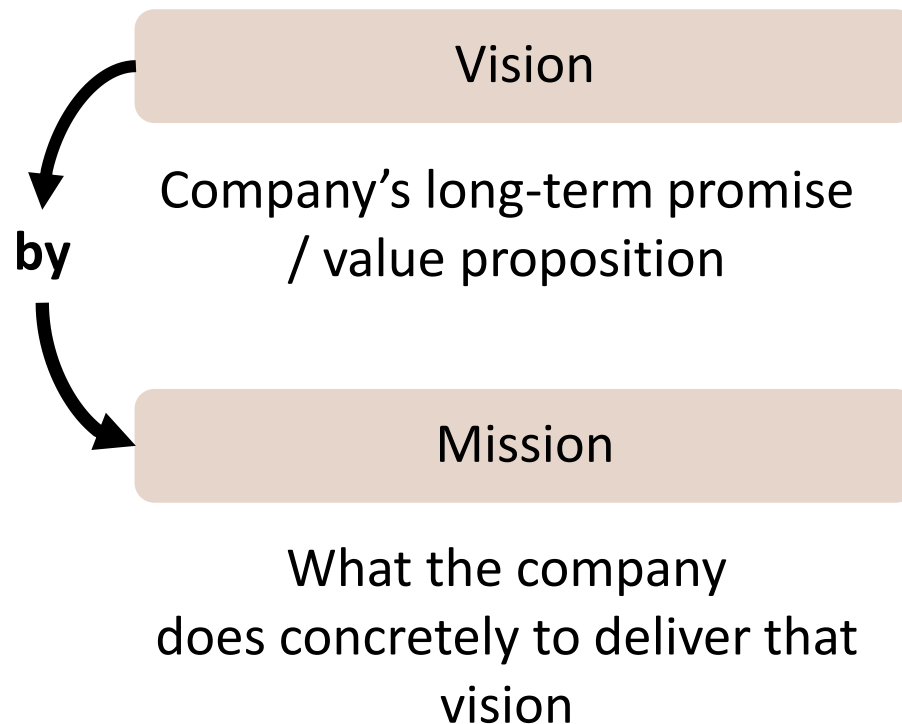

What is the vision ?

Why it matters:

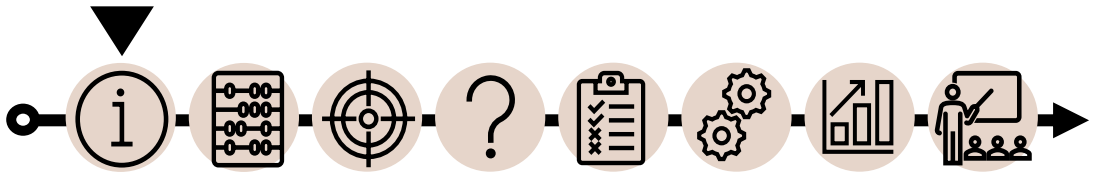

It sets the direction and defines what success means.

Theory

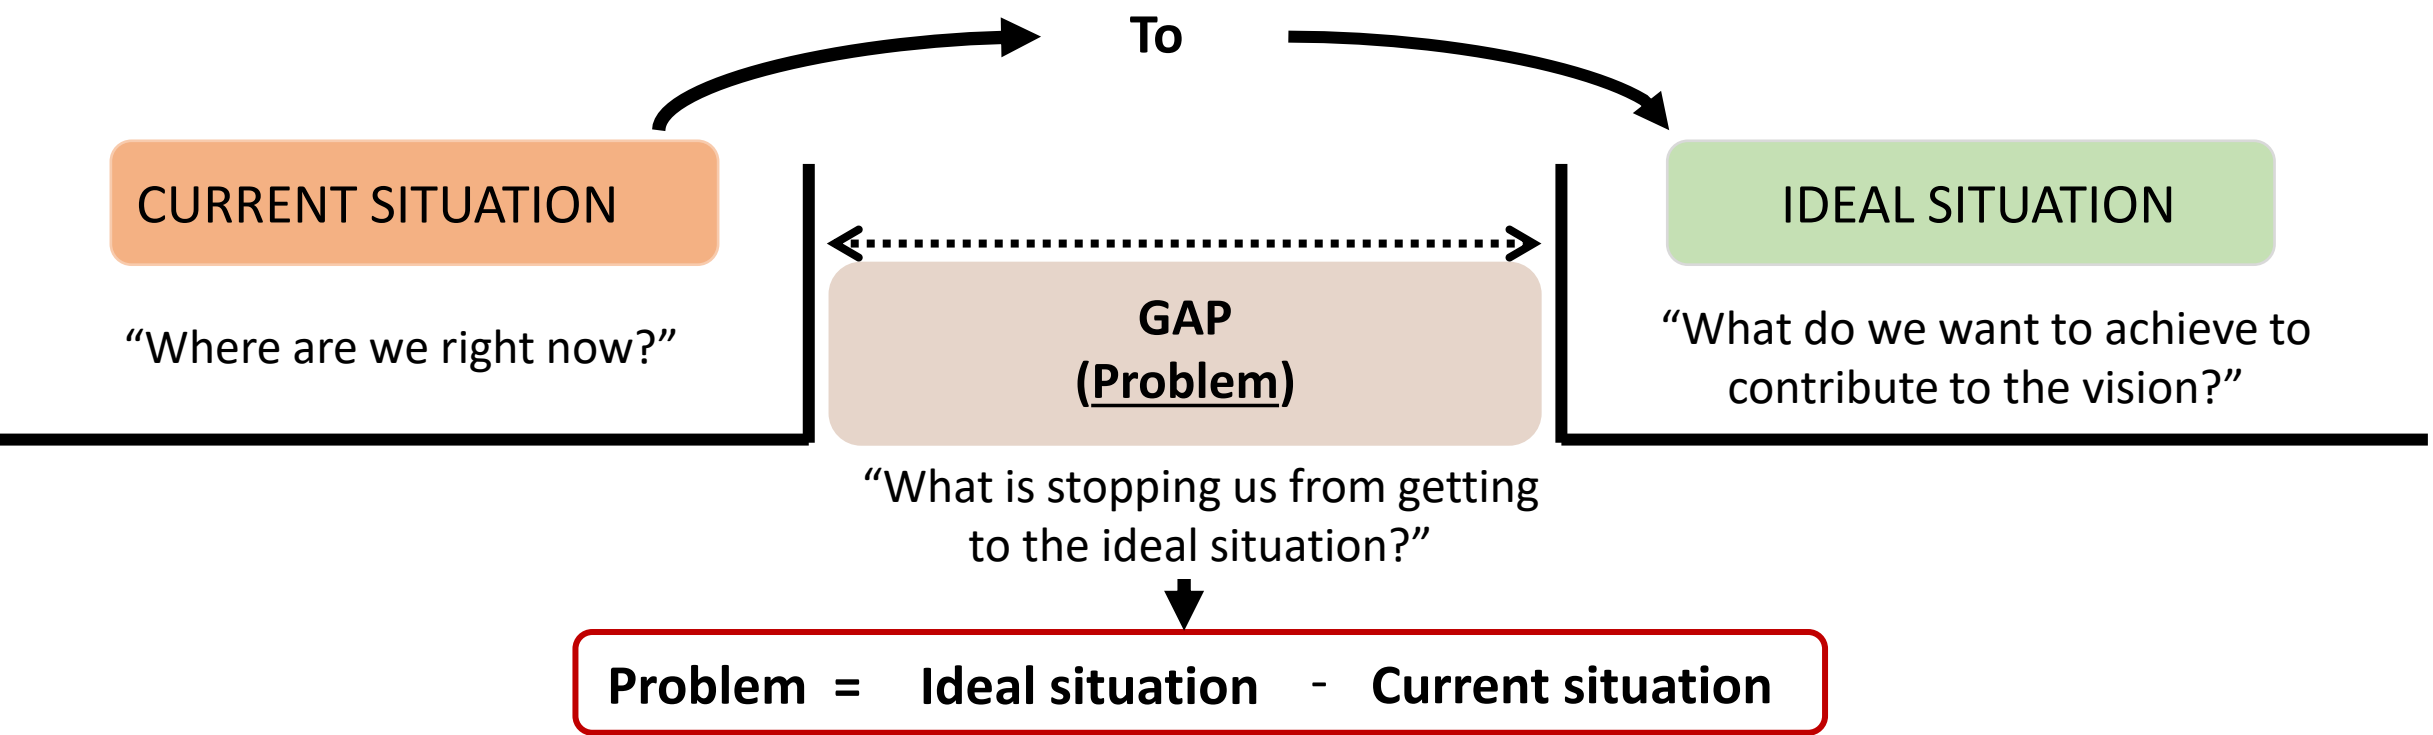

Application : Amazon

Step 1: Clarify the problem

Purpose : Align with stakeholders on a fact-based definition of the problem.

Output	A clear problem statement that describes the gap between current and ideal situation.
--------	---

Step 1: Clarify the problem

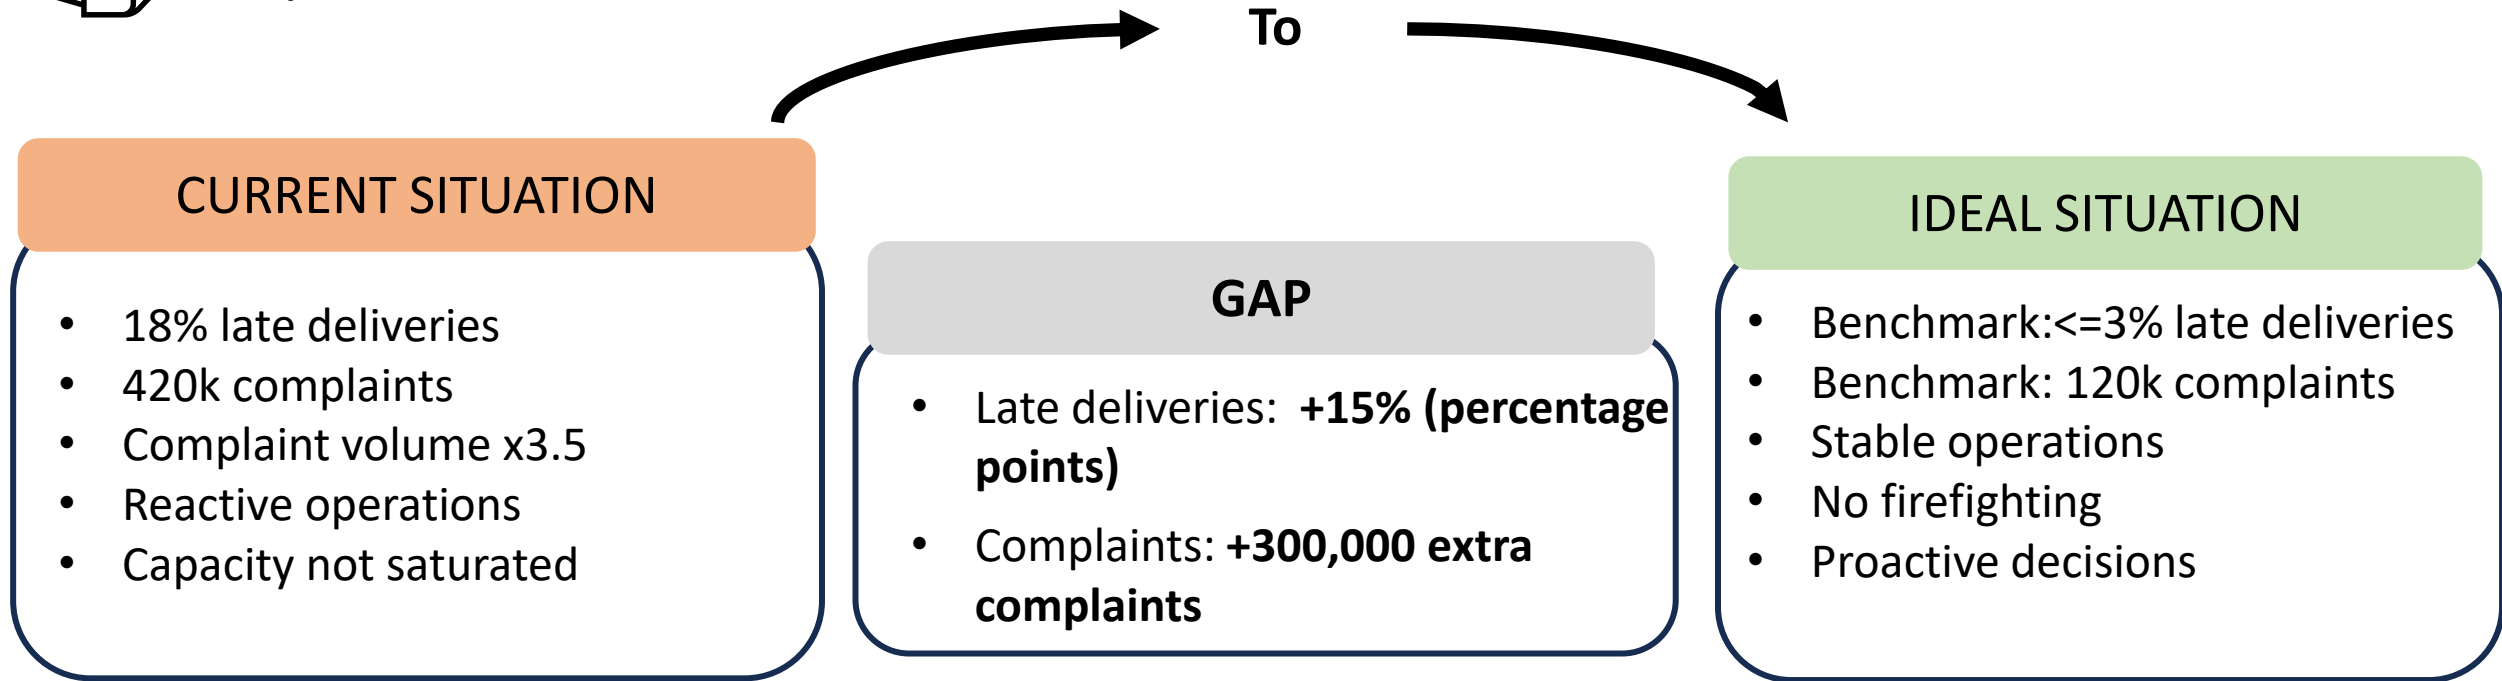

Success criteria

- Ideal & Current are measurable
- Using the gap as reference, make your final mission statement using the 5W2H method (What, Who, Why, Where, When, How & How much)
- Gap is quantified (time, %, €, volume)
- Focus on the facts, not opinions

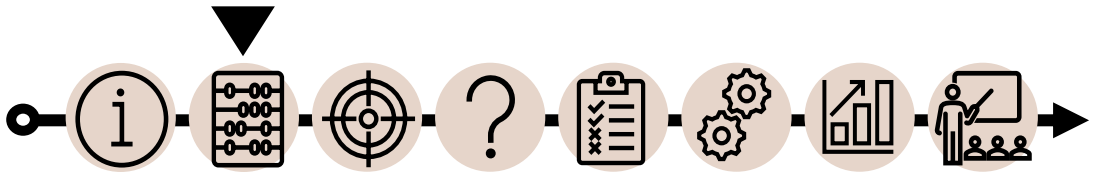

Step 1: Clarify the problem

 Proposed solution

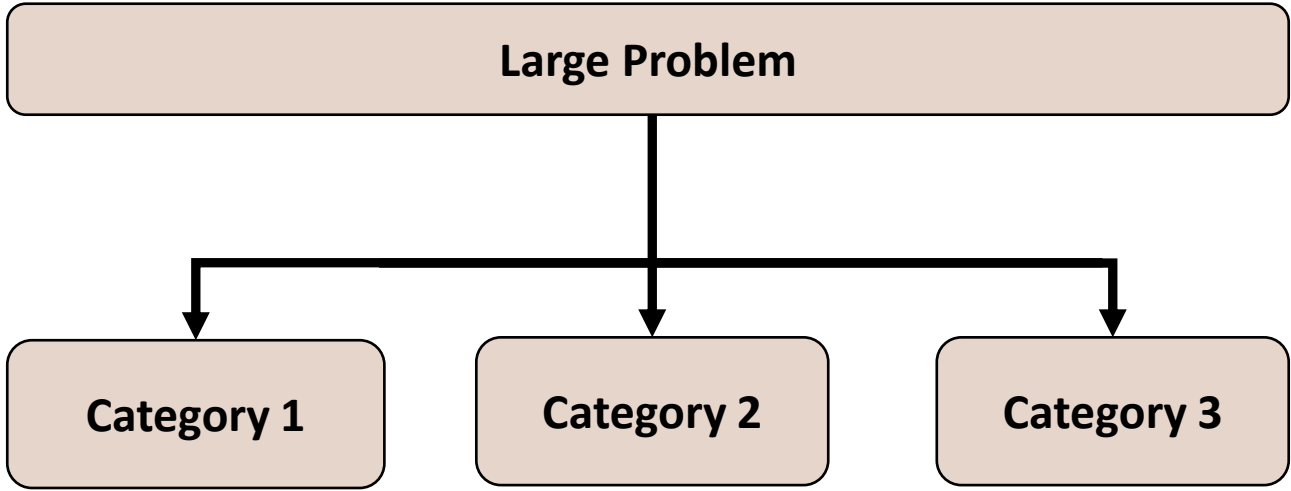

Problem statement:

Amazon's on-time delivery performance is currently lagging behind industry benchmarks by **15 percentage points** compared to the $\leq 3\%$ gap typically seen in the industry.

Step 2: Breakdown of the problem

Purpose : Decompose the problem and make it manageable.

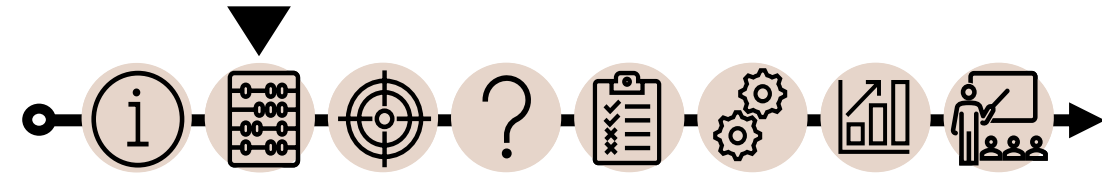

1 **Decomposition**
decompose by process, by people etc.

2 **Priorization**

Output	A prioritized problem to focus on.
--------	------------------------------------

Step 2: Breakdown of the problem

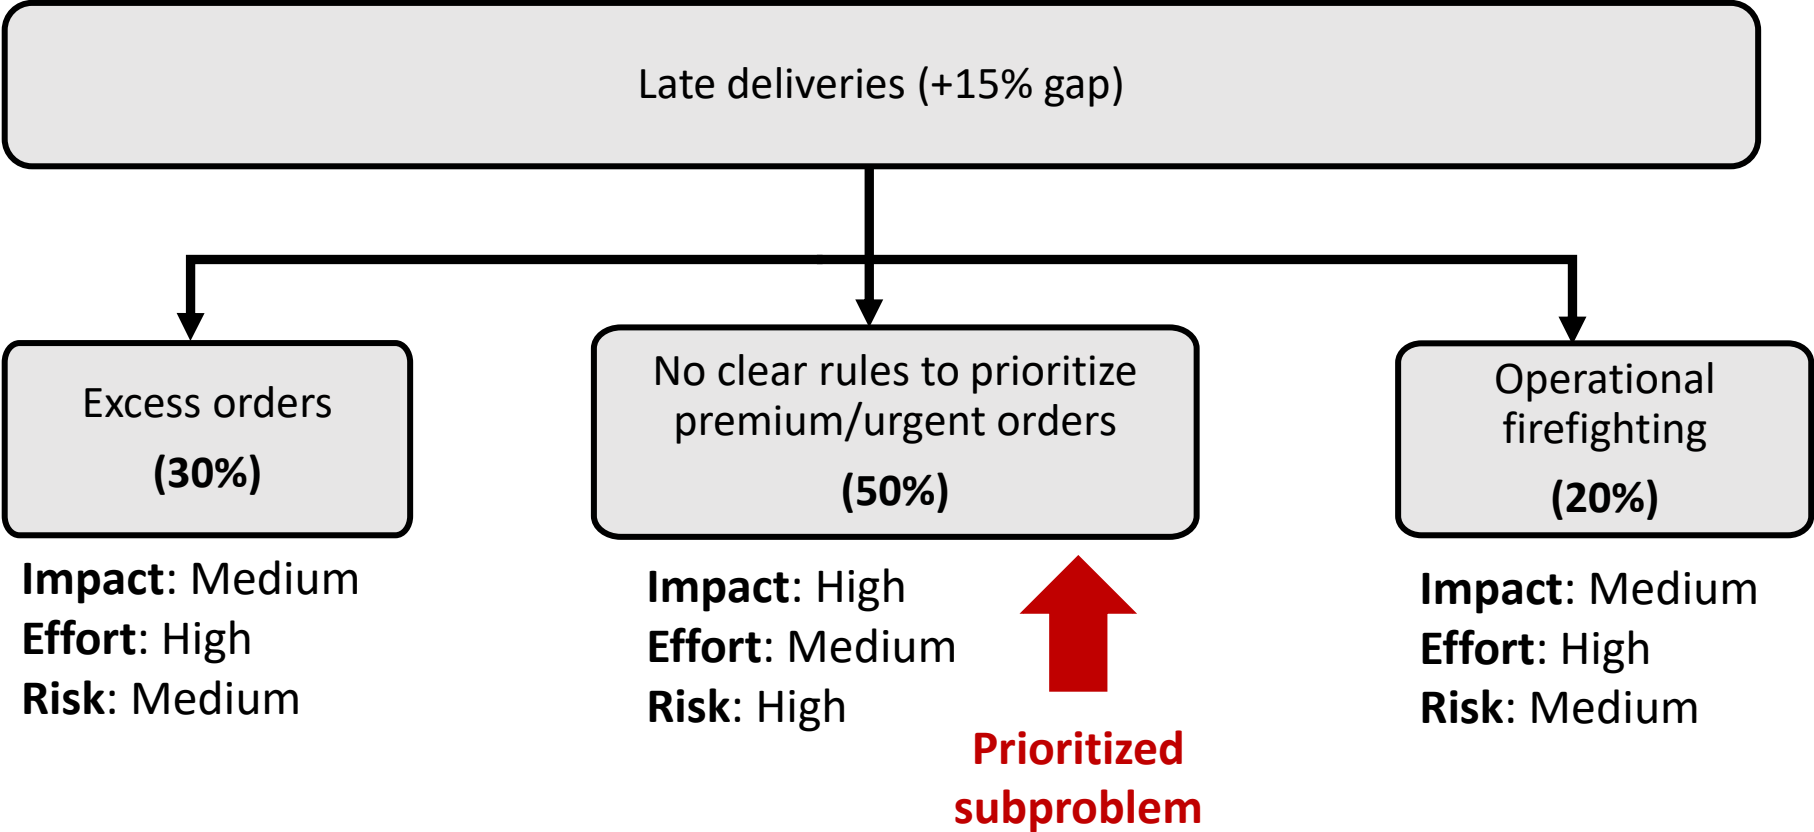

Success criteria

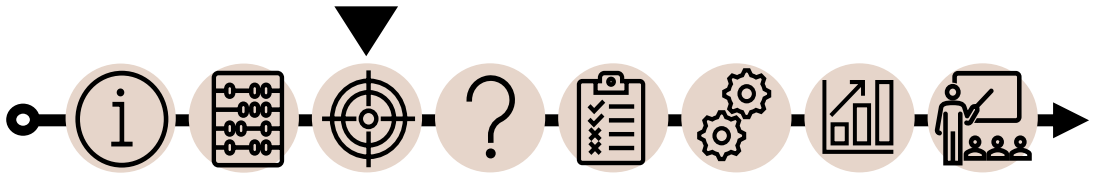

- A. Use one clear lens to decompose using Problem tree or Fishbone method
- B. Prioritize using weighted scoring using Impact/Effort/Risk or Pareto method
- C. Select one primary focus before going deeper

Step 2: Breakdown of the problem

 Proposed solution

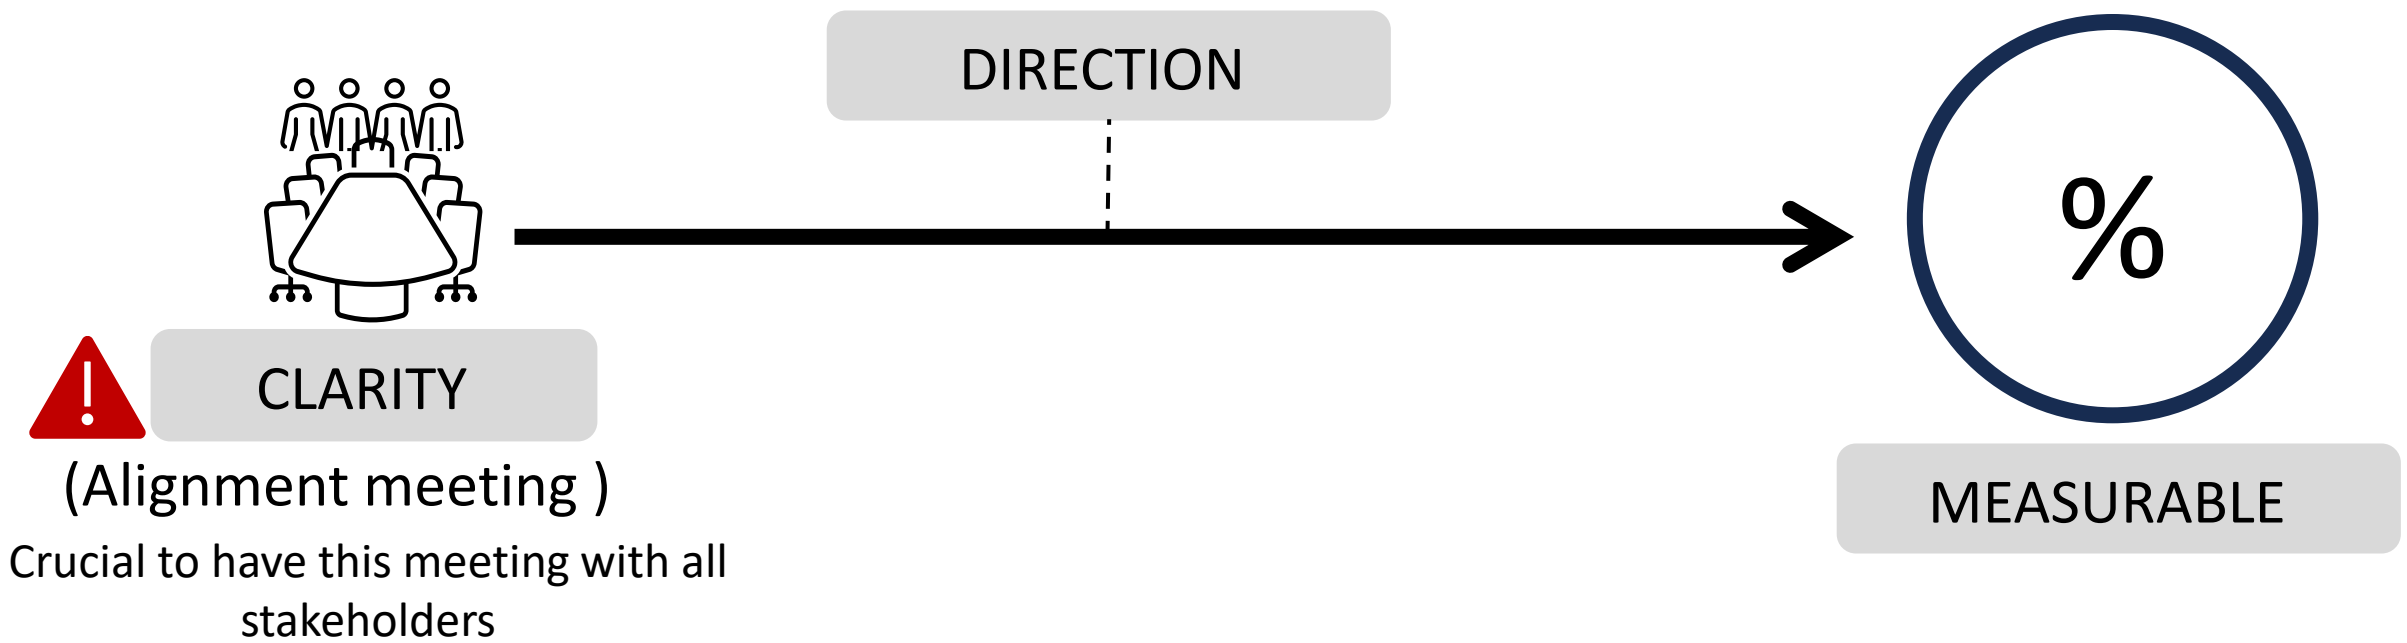

Step 3: Set the target

Purpose : Establish clear goals to guide actions and decisions.

With a Target:

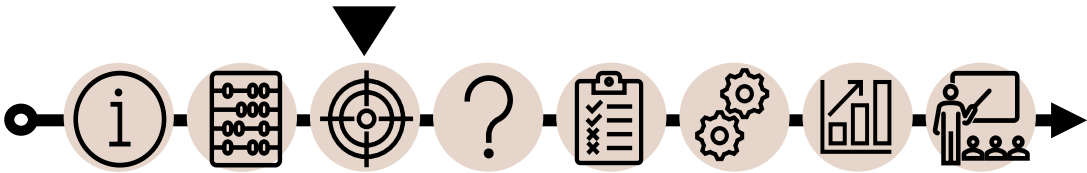

Why it matters:	To create alignment and prevent teams from solving acting independently.
-----------------	--

Step 3: Set the target

Success criteria

- Set the target using the SMART method.
(Specific, **M**easurable, **A**chievable, **R**ealistic, **T**ime bound)
- Clearly address the prioritized sub-problem and not a different scope.
- Each target is measurable with a precise metric, a baseline, a scope.
- Targets are controllable and external dependencies are stated as risks.

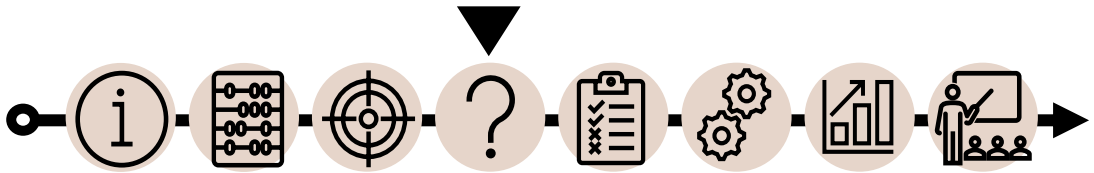

Step 3: Set the target

 Proposed solution

 Target:

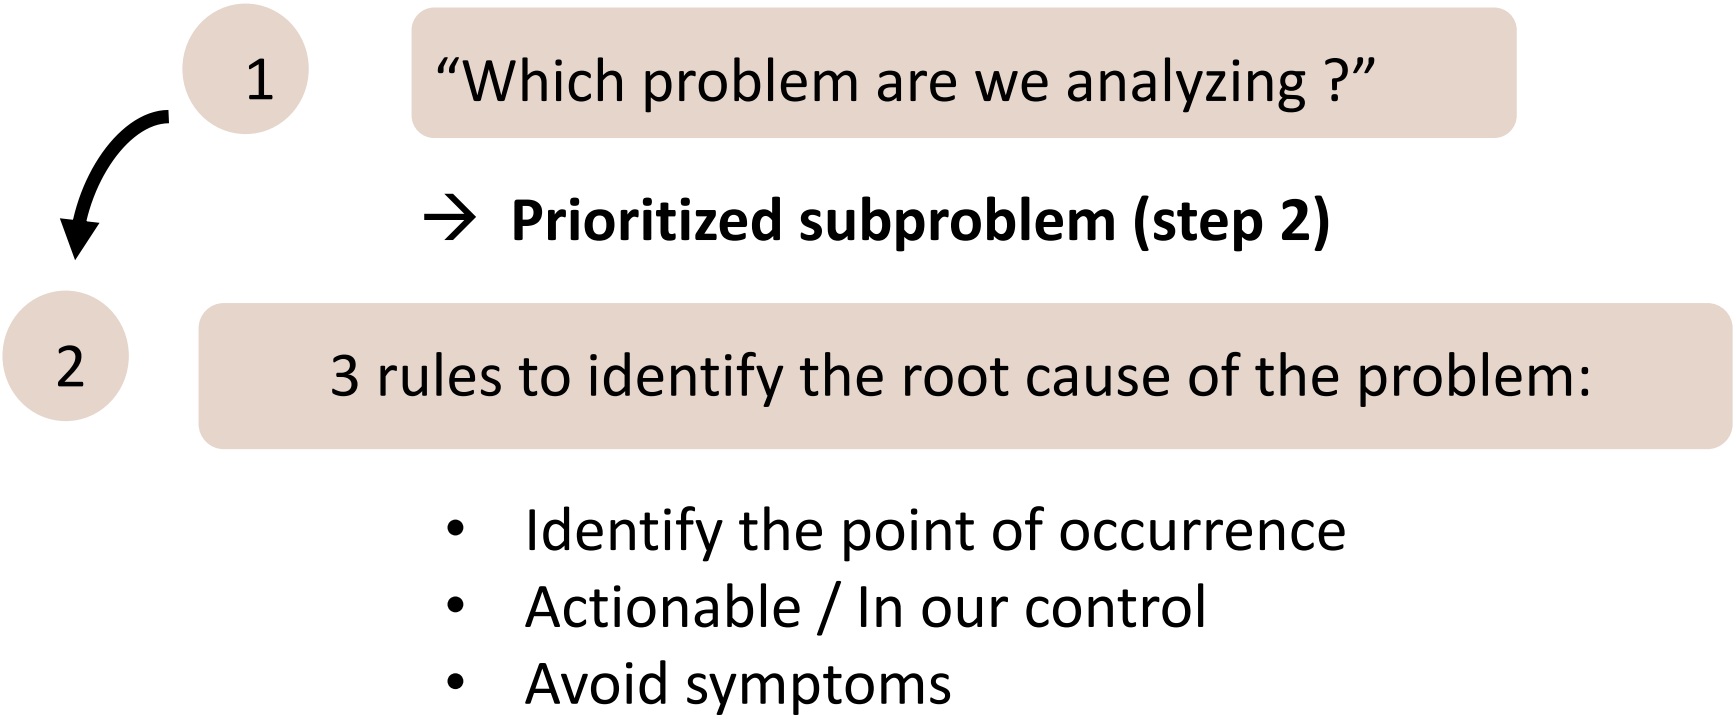

- Reduce late deliveries from 18% to the benchmark level of $\leq 3\%$ by next Boxing Day, by clarifying prioritization rules internally.

Target	Specific	Measurable	Achievable	Relevant	Time bound
T1	Improve delivery performance	Late deliveries 18% $\rightarrow$ $\leq 3\%$ (360k fewer late orders)	Based on planning fixes + rules (in scope)	Contributes to vision (customer satisfaction)	By next Boxing Day

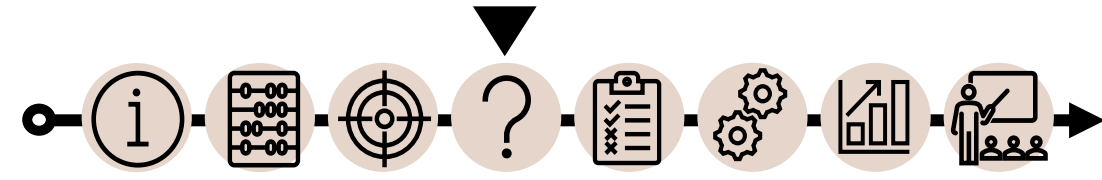

Step 4: Analyze root cause

Purpose : Understand why the problem exists.

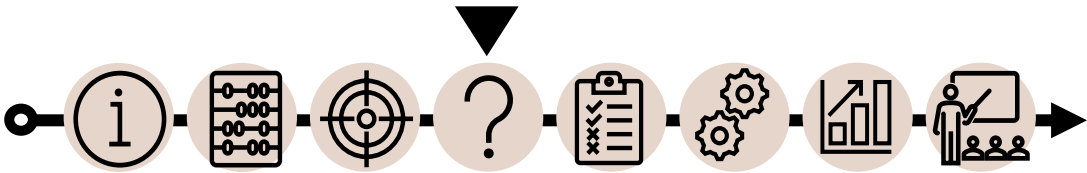

Output	A root cause on which we can act upon to help achieve the target.
--------	---

Step 4: Analyze root cause

Success criteria

- The 5 Whys are fact-based and logically consistent, not opinion-based.
- The final root cause is actionable within our span of control.
- The root cause prevents recurrence and is not just a symptom.
- Identify the point of occurrence.

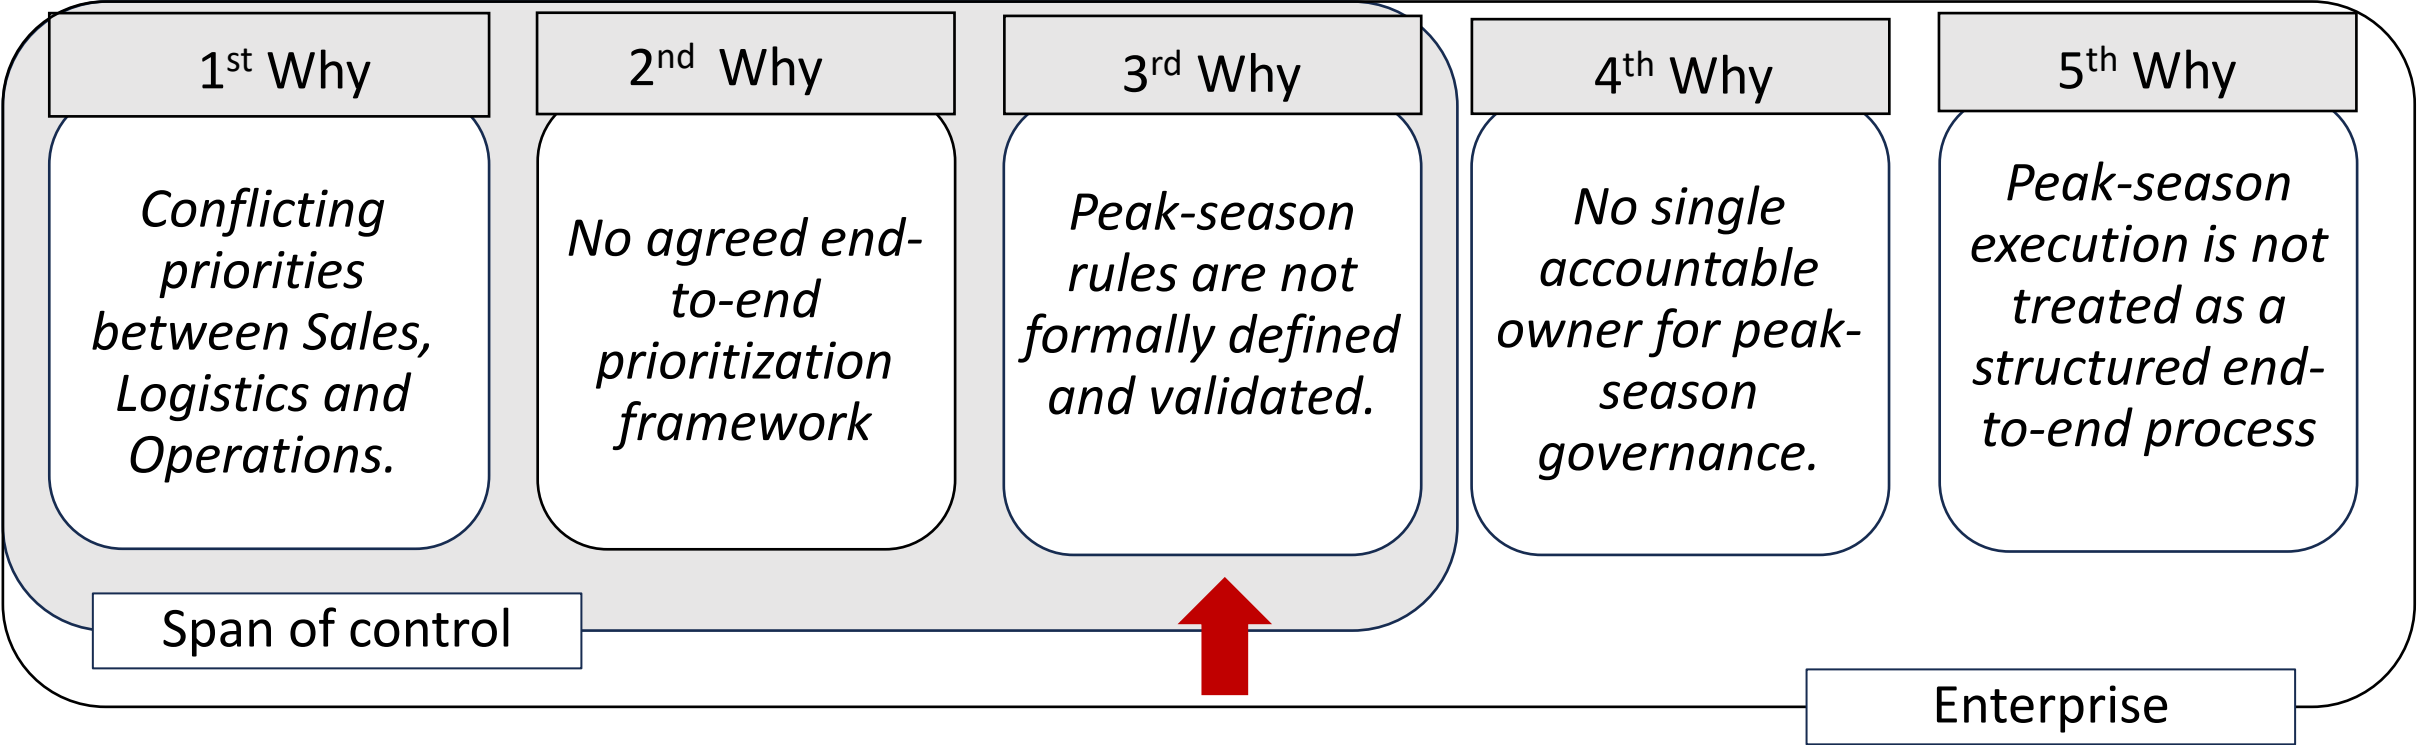

Step 4: Analyze root cause

 Proposed solution

Prioritized subproblem:

No clear rules to prioritize premium/urgent orders

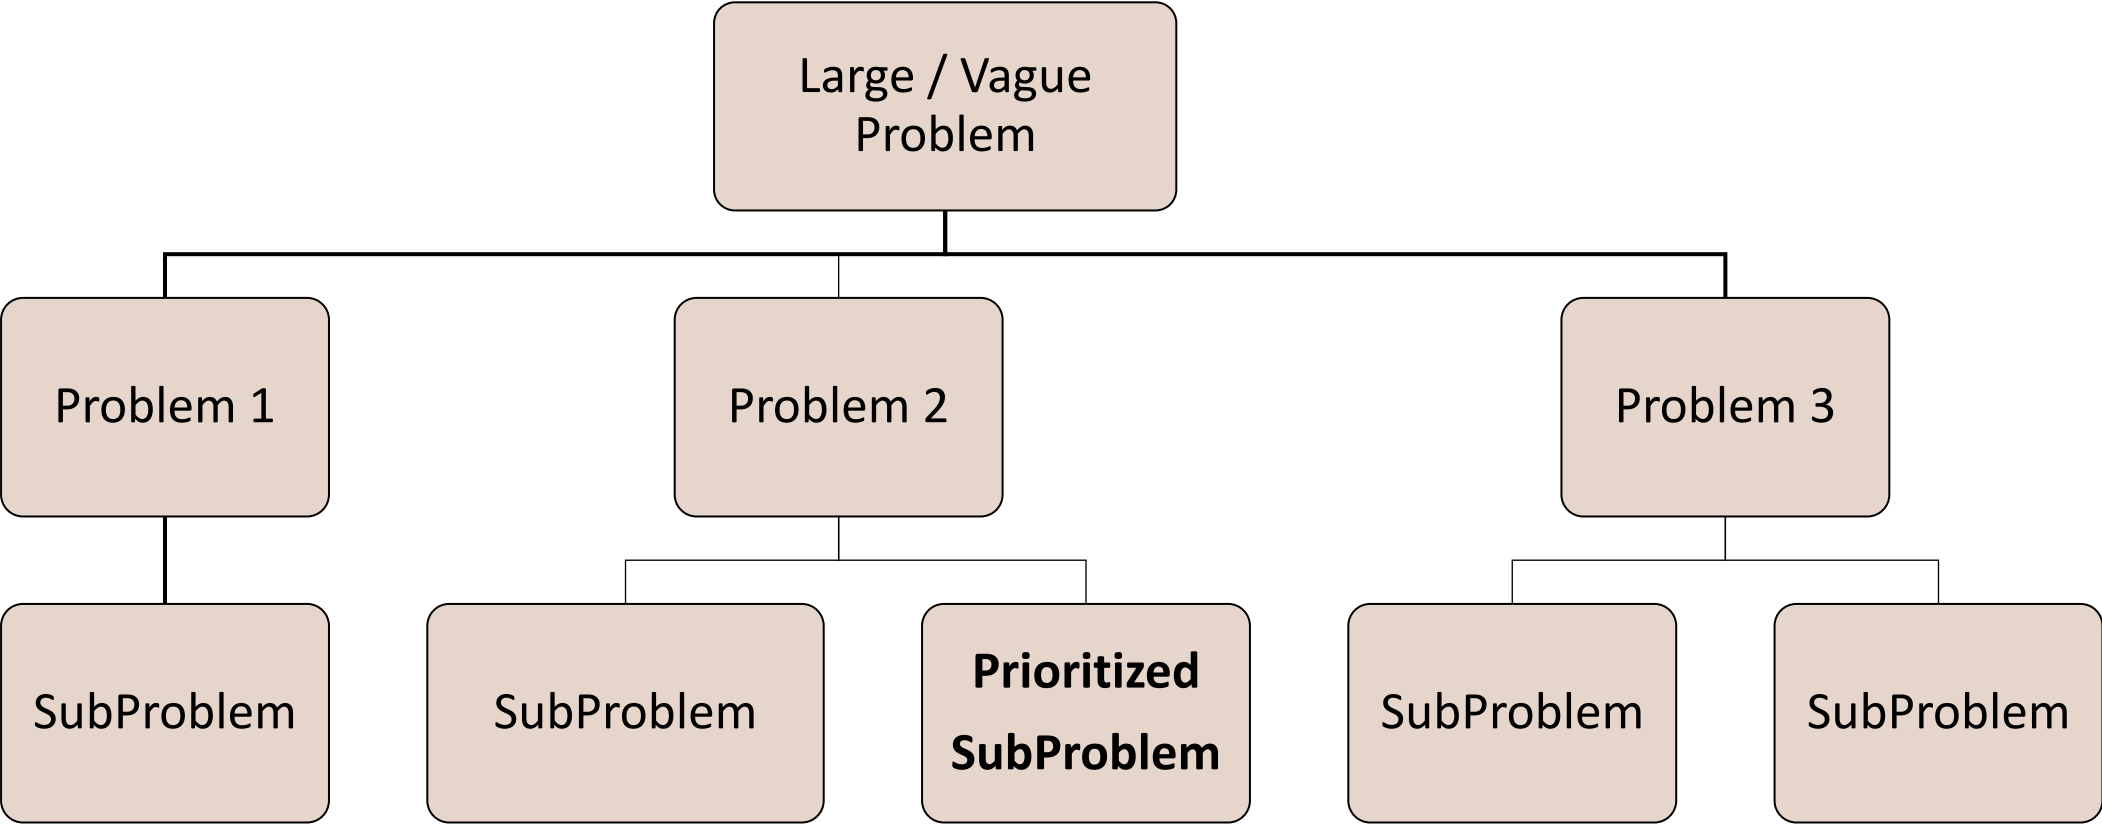

Gap Analysis (2 ways)

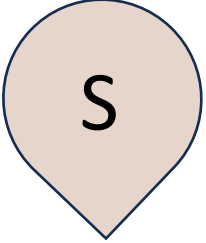

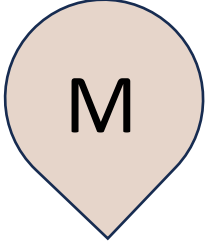

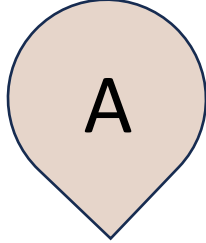

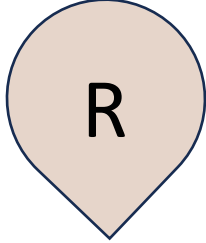

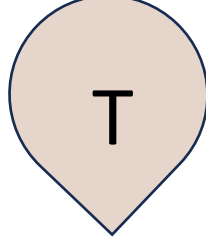

Ideal situation	Gap
	Current situation

AS-IS	TO-BE
Gap	

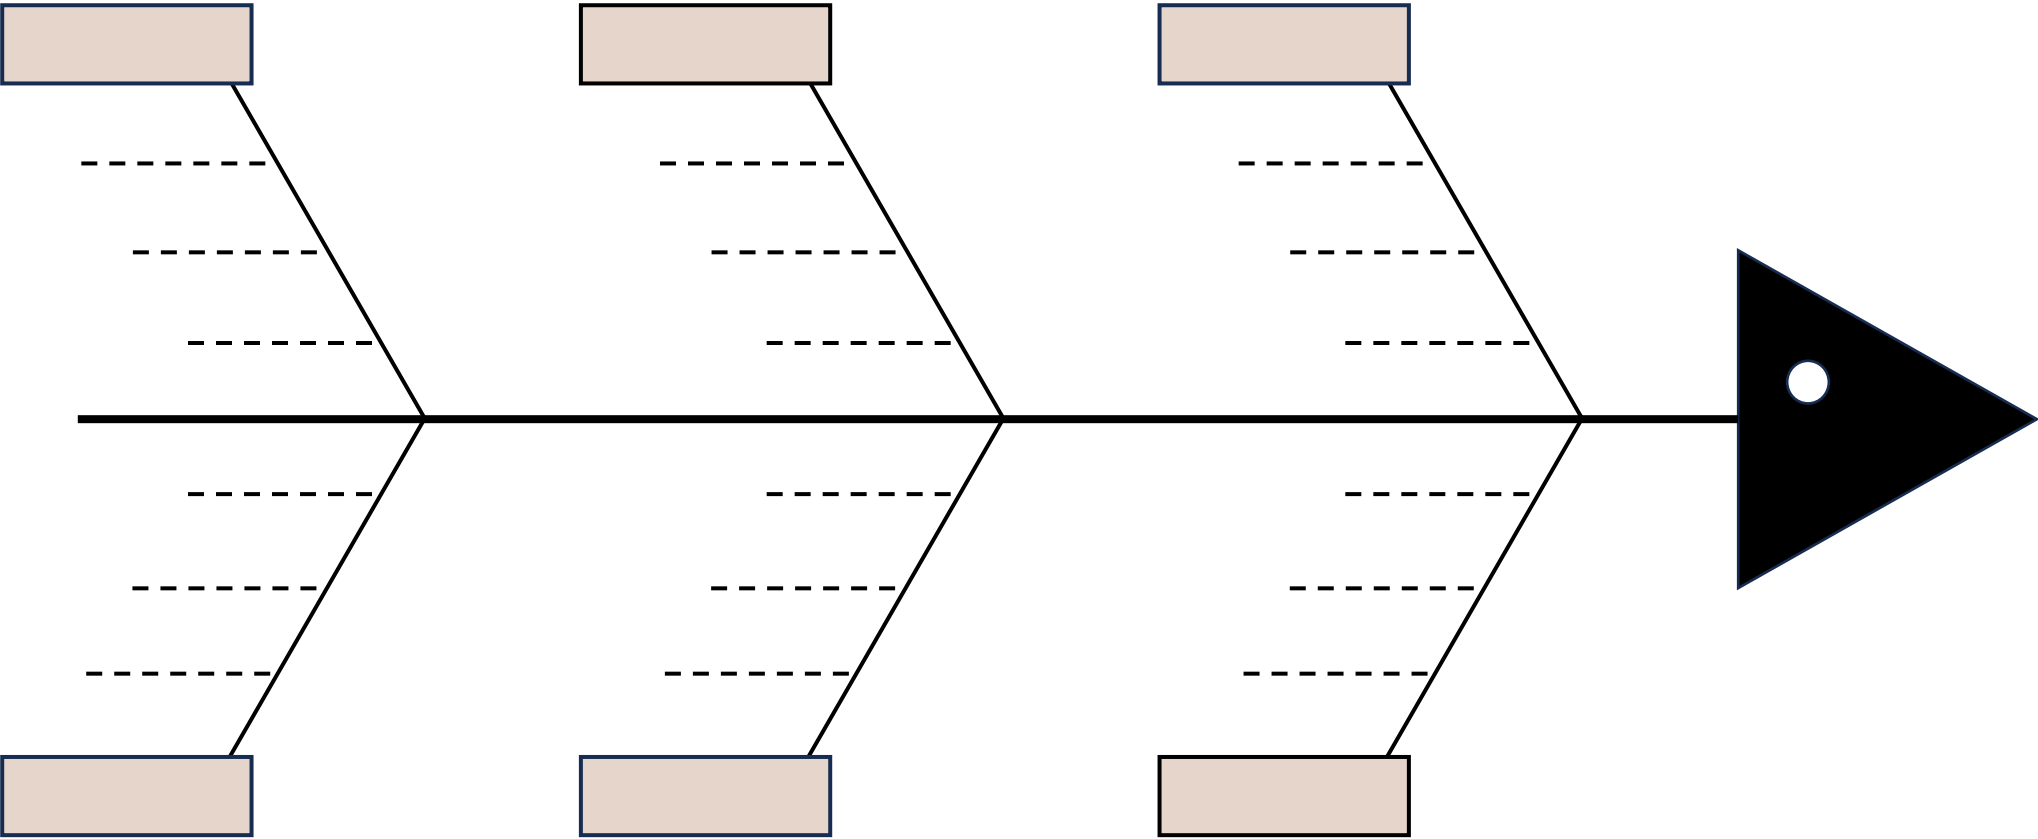

Problem tree

SMART target

				
Specific	Measurable	Achievable	Relevant	Time-based

Fishbone Diagram

5 Whys

Prioritized problem:	
----------------------	--

1 st Why	2 nd Why	3 rd Why	4 th Why	5 th Why

ULB/Intys - Workshop Roadmap 2026

	Date	Objectives
Kick off and program framing	Week 1 - 20/02/2026 (2h)	• Present the program framework and expectations • Introduce the Intys Methodology and the business case
Define Problem	Week 2 - 27/02/2026 (4h)	• Application Isolv 1/2/3/4 • Working time in groups • Presentation & Feedback
	Week 3 - 06/03/2026 (4h)	• Application Isolv 1/2/3/4 • Working time in groups • Presentation & Feedback
	Week 4 - 13/03/2026 (4h)	• Application Isolv 1/2/3/4 • Working time in groups • Presentation & Feedback
	Week 5 - 20/03/2026 (4h)	• Diagnostic group presentation
Define Solution	Week 6 - 01/04/2026 (4h)	• Application Isolv 5 • Working time in groups • Presentation & Feedback
	Week 7 - 08/04/2026 (4h)	• Application Isolv 6 • Working time in groups • Presentation & Feedback
	Week 8 - 16/04/2026 (4h)	• Application Isolv 6/7/8 • Working time in groups • Presentation & Feedback
HOLIDAYS		
Fine Tuning	Week 9 - 06/05/2026 (4h)	• Q&A
	Week 10 - 13/05/2026 (4h)	• Presentation skills - tips and tricks
	Week 11 - 22/05/2026 (4h)	• Dry run of final presentations
EXAM	08/06/26	• Written reports
EXAM	16/06/26	• Final presentations

Step 5: Develop Counter-measures

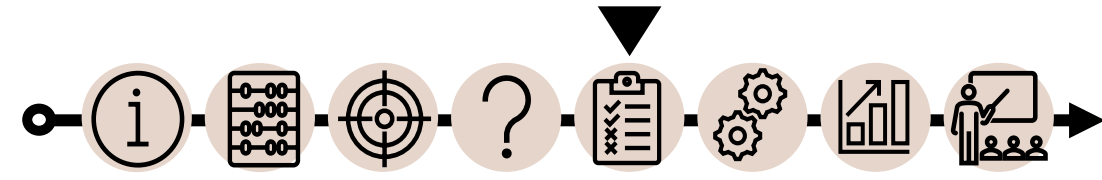

Purpose : Design solutions that directly address the root cause(s).

- (1) Design solution: generate options “if no constraints”
- (2) Decide best option: apply constraints and criteria to select

	Hard constraints		Soft constraints		
	Constraint 1	Constraint 2	Constraint 3	Constraint 4	Constraint 5
Countermeasure 1	V	X	V	V	O
Countermeasure 2	X	X	X	V	X
Countermeasure 3	V	V	V	O	V

Output	A validated decision + mandate (sponsor approval) to implement.
--------	---

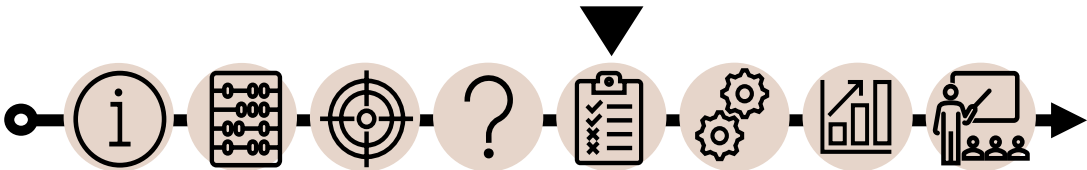

Feasible V
Potentially O
Rejected X

Step 5: Develop Counter-measures

Success criteria

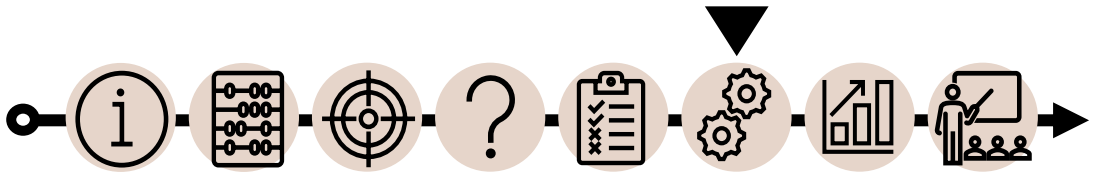

- Generate at least 3 countermeasures for the same root cause.
- List hard and soft constraints agreed with the sponsor.
- Compare options in a feasibility matrix and select the best fit.
- Justify the selected option with facts, trade-offs, and constraints.

Step 5: Develop Counter-measures

 Proposed solution

	Hard constraints			Soft constraints		
	Time bound	Legal	Delivery promises	Manual intervention	Budget	Cross-team collaboration
Peak-season freeze calendar	V	V	V	X	O	O
Peak-season Rulebook	V	V	V	O	O	V
Escalation Rule + RACI	V	V	V	O	O	O
Daily Peak War Room	V	V	O	O	V	O
Full process redesign	X	O	X	O	O	X

Step 6: Implement

Purpose : Turn solutions into actions.

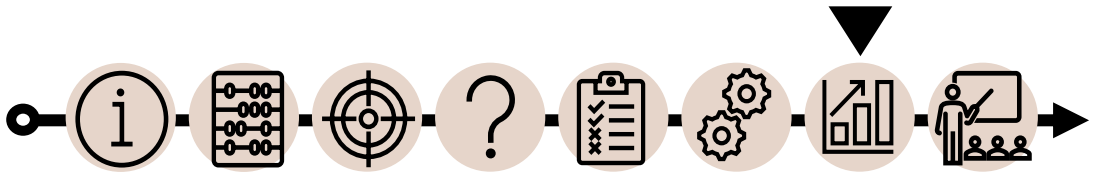

- 1 Who does what? (RACI table)
- 2 When? (Gantt Chart, Roadmaps)

Step 6: Implement

Key giveaways and tips

- Make sure the timeline for each task is realistic.
(Things to consider: Mission duration, skills, stakeholders' capabilities, available staff etc...)
- Assign roles & responsibilities (RACI method)
- Visualize the timeline with all the task to implement (Gantt Chart or Roadmap)

Step 7: Monitor Progress

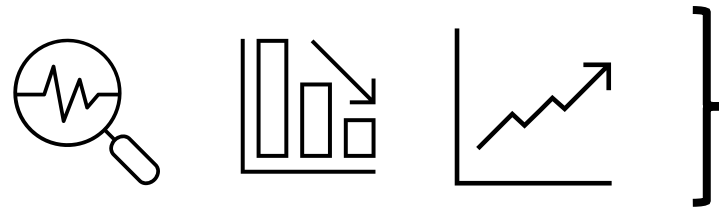

Purpose : Track performance and enable timely decision-making.

Monitoring

Bridge between action/execution & impact
How?

Tools & systems (Dashboards, KPIs, Reporting tools...)

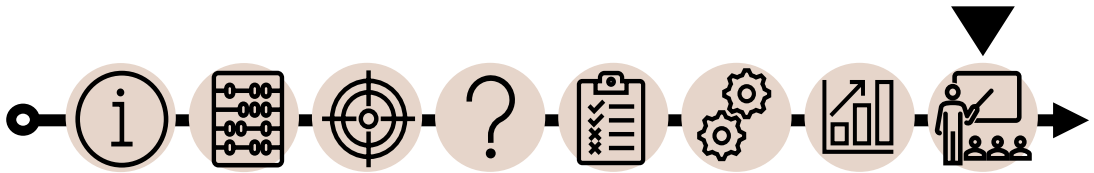

“Which tool/system will allow me to best track and evaluate the impact of the solutions I implemented?”

Step 7: Monitor Progress

Success criteria

- Have only a few KPIs that are key
- Build a governance framework around these KPIs (ex: Dashboards, Touchpoints..)
- Define clear thresholds & pre-agreed actions
- Monitor adoption of rules or solutions

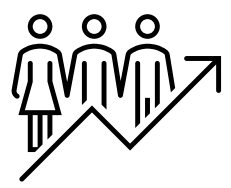

Step 8: Capture Lessons Learned

Purpose : Convert experience into organizational learning.

Projects produce results, but **learning** produces organizational maturity.
Without capturing lessons learned, mistakes **reappear** and improvements are temporary.

Lessons learned should ensure:

1 Continuous improvement

2 Sustainability

Step 8: Capture Lessons Learned

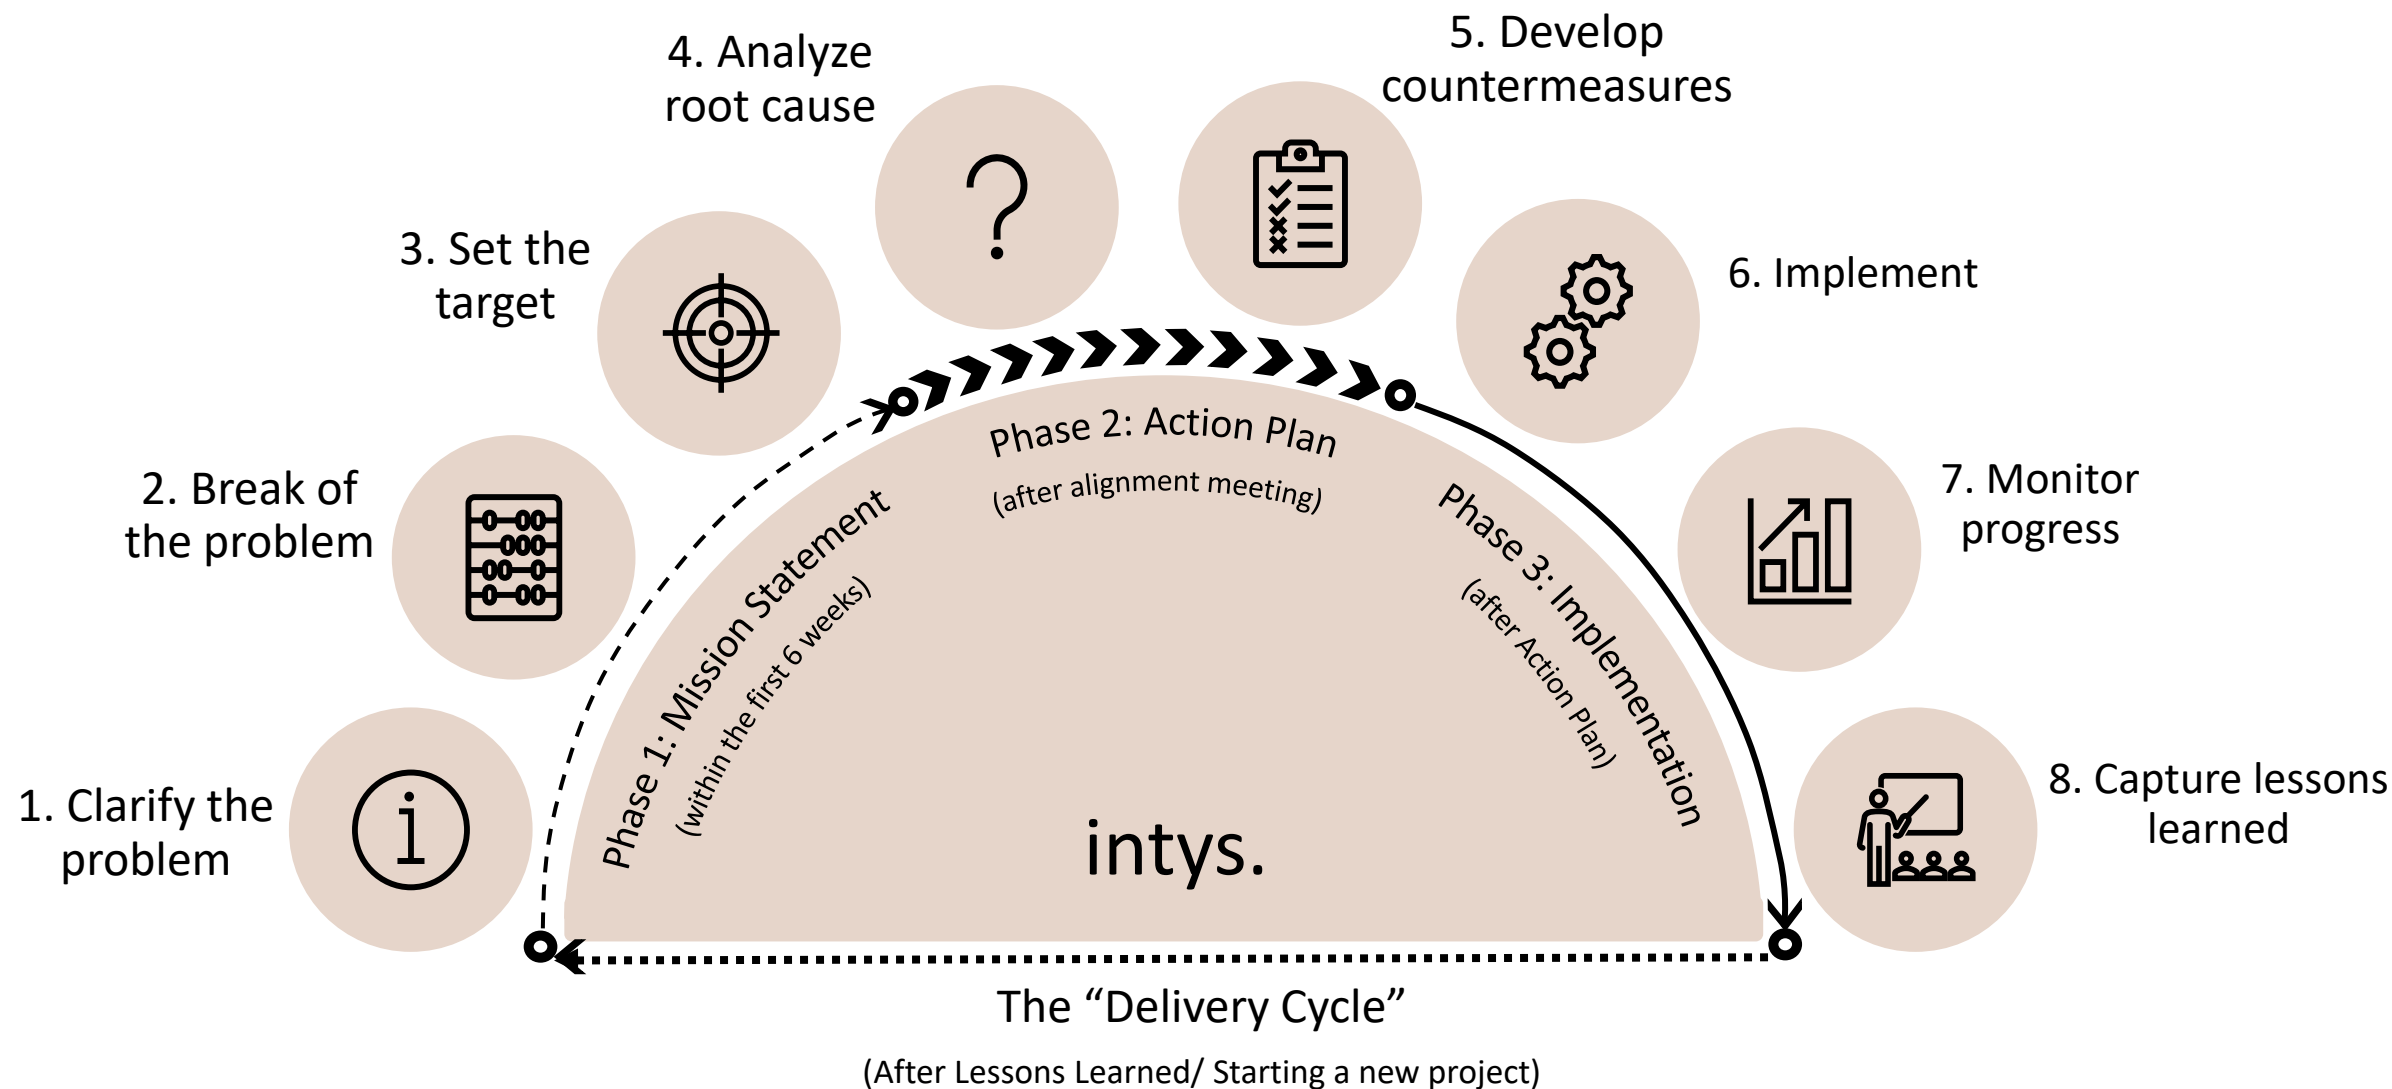

Success criteria

- Identify key behavioral and structural changes during the mission
- Ensure a good handover to avoid recurrent patterns (ex: documentation)
- Include lessons into existing routines (ex: reusable templates, checklists)

Best Practices tools to
print

ISolv Methodology – 8 Steps

Feasibility table (Develop Countermeasures)

Root cause	Counter measures	Finance	Legal	HR	Maintenance	To be implemented
(Root cause)	(Countermeasure 1)			x	o	☐
	(Countermeasure 2)			Δ	Δ	☐

O: OK
Δ: To negotiate
X: not OK

RACI (R=**R**esponsible, A=**A**ccountable, C=**C**onsulted, I=**I**nformed)

Activities/ Ressources	Role 1	Role 2	Role 3	Role 4	Role 5
Task 1					
Task 2					
Task 3					
Task 4					

Gantt Chart

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7
Task 1							
Task 2							
Task 3							
Task 4							

Simple roadmap
